

To Whom It May Concern

This season I purchased for my Vineyard at Cranbrook Estate in Tasmania, a Super Birdxpeller Pro [SBXP] from Leone Scobie of Birdxpeller Australia and New Zealand.

Leone was particularly helpful with advice, as to which unit to buy, and how many units for my size of vineyard.

When I made the decision to acquire a SBXP electronic bird repeller from Leone she advised me to have the unit modified to take plug in micro chips, this I found very useful as during the season different birds move through out the vineyard and as there are 8 sounds on each microchip, I have found it particularly useful to be able to change the microchips myself introducing the different sounds as the different bird species come into the vineyard. I think it is an excellent idea to have interchangeable micro-chips and I found the versatility of the different sounds and frequencies throughout the vineyard keeps the birds guessing longer.

Leone Scobie has provided excellent advice and service and has good product knowledge which allows her to give after sales service as required.

I am extremely pleased with the purchase I made from Leone Scobie of the SBXP. It has meant that I have gone through this vintage without having to use my nets. Without having the expense and time of putting nets on and off, it has in fact paid for the electronic bird repeller.

I am very happy to recommend the Birdxpeller electronic bird repelling equipment and the service that I have received has been very good.
